Fullstack developer

Despre mine

Hi, I am a software developer currently looking for opportunities. For ten years I was based in China as a Freelance dancer and it was here that I began to learn about development when I built my team's website.

I also taught myself how to design and edit promotional materials with Photoshop and dance videos in Premiere Pro. Although I taught myself the basics of HTML and CSS I was driven to learn more.

I joined a remote development school called Microverse and have spent most of the last year refining my technical (JavaScript, React, Nodejs, Ruby, Ruby on Rails, HTML, CSS,) and soft (Remote pair programming/Communication/Collaboration) skills.

I work remotely with teams from all over the world, solving challenges by working together. Through this program, I have created a disciplined way of self-learning and focus.

Over the course of my career, I have honed skills in the following technologies:

- Front-end development: JavaScript | ReactJS | NextJS
- Back-end development: Ruby on Rails, Nodejs Express
- Databases: MongoDB | PostgreSQL
- Infra: Netlify | GCP | DigitalOcean | Heroku
- Styling: SASS | CSS-in-JS | Bootstrap | Semantic-Ui
- Design: Photoshop | Illustrator | After-Effects

Check out some of my projects and please, do feel free to reach out:

- CSS
- HTML
- SCSS
- JAVASCRIPT
- REACT
- REDUX
- RUBY
- RUBY ON RAILS
- NEXTJS
